

Unlocking Value-Based Contract Success

Empower Providers.

Maximize Performance.

Increase Risk Sharing.

SpectraMedix delivers a purpose-built modular platform that drives operational excellence across business lines and provider networks—with transparency into value-based contract financial performance, quality, risk, and utilization—to enable health plans to establish trust with providers, maximize revenue, and efficiently scale their value-based portfolio.

Why SpectraMedix?

- ✓ **Operational infrastructure to power value-based contracts** with birds-eye view of value-based portfolio performance
- ✓ **Connects quality, risk, utilization, and contract terms with financial performance** and drill-down to contract, practice and provider
- ✓ **Enables providers with the right information** they need to succeed and take on more risk
- ✓ **Reduces friction and improves transparency and trust**
- ✓ **Eases joint operations committee reporting** with practice-level transparency
- ✓ **No more spreadsheets** and inefficient manual processes

Drive Operational Performance for All Contract Types

Our powerful analytics engine provides a complete picture of your plan's performance in value-based contracts so you can more effectively manage your portfolio across all lines of business

-  **Track value-based payment performance** and deliver actionable insights across quality, risk, utilization, and financial value levers
-  **Settle contracts monthly** to monitor financial results and compare providers and practices to identify top and poor performers
-  **Identify opportunities to increase** operational and value-based contract performance
-  **Improve Joint Operating Committee (JOC) efficacy** with comprehensive reporting
-  **Design and optimize contracts** with scenario modeling

- > **Insight into performance by line of business**, region, market, and contract
- > **Contract settlement with budget variance** to compare programs, practices, and providers
- > **Identify missed opportunities** to improve across risk, quality, and utilization for better value-based contract return
- > **Contract modeling with different value levers**—markets, lines of business, attribution, TINs, quality measures and associated incentives, contract terms, stop-loss, and plurality
- > **Catalog of configurable value-based contract reports**

Empower Provider Success with Actionable Value-Based Payment Insights

- > **Incentives**—earned and unearned
- > **Total quality score** with measure-level detail including health equity
- > **Risk scores** including risk score loss potential, annual wellness visits, and chronic condition revalidation
- > **Gaps in care** and coding with consolidated chase lists
- > **Cost and utilization** benchmarks
- > **Super user** identification
- > **360°** member summary
- > **Timely and actionable data** including ADT information

We deliver timely insights that empower providers to thrive with value-based contracts and to improve member health.

Reduce friction, foster trust, and ensure regulatory compliance through transparency and sharing of actionable information in a provider-friendly view

Meet providers where they are by integrating with key systems such as provider portals and EHRs

Engage and enable providers to manage and optimize performance

Personalize insights by contract, practice, and provider to highlight contract performance, incentives earned, and what to do to course-correct before year-end

Enable the Transition to Greater Risk-Sharing

Our comprehensive platform **connects financial performance with risk, quality and utilization** to help you guide and partner with providers to evolve toward accepting more risk in their value-based contracts.

Evaluate which providers are ready to take on more risk

Model contracts and simulate performance for provider transition to shared savings, shared risk, or capitation

Overcome provider reluctance to risk with additional actionable, value-based insights that strengthen provider confidence and probability of success

- > **Simulate** scenarios and financial performance
- > **Facilitate provider transition** into shared risk and capitation
- > **Flexibility for all value-based contract types** (P4Q, shared savings, shared risk, capitation, total cost of care, maternity bundles)
